In Switzerland, these financial instruments are considered structured products. They are not collective investment schemes within the meaning of the Swiss Federal Act on Collective Investment Schemes (CISA), and are therefore not subject to the regulations of the CISA or the supervision of the Swiss Financial Market Supervisory Authority FINMA. The investors bear the issuer's or the guarantor's credit risk.

Product Description

These products are characterised by one or several guaranteed Coupons, a Barrier as well as by a – albeit only conditional – redemption at the Nominal Value. If the Underlying closes at or above the Autocall level on a Monitoring date, the Nominal Value together with a Coupon is repaid early (for details see "Early redemption" as well as "Coupon payments"). If no Early Redemption has been made, the following settlement conditions shall apply upon maturity: A redemption at the Nominal Value is guaranteed as long as the Underlying has not touched its Barrier during the relevant Barrier monitoring. If the Underlying has touched its Barrier but at Final Fixing is again higher than or equal to the Strike Price, the Nominal Value is repaid. Nevertheless, if the Underlying has touched its Barrier during Barrier Monitoring and at Final Fixing is lower than the Strike Price, the investor receives the delivery of the Underlying or a cash compensation, corresponding to the closing price of the Underlying (for details see "Redemption/Delivery").

Tax treatment in Switzerland

Swiss Income Tax	This product does not qualify for predominantly one-off interest payments (Non-IUP). The coupons consist of two components: the premium component, which in Switzerland qualifies as a tax-free capital gain, and the interest component, which in Switzerland is subject to direct federal tax (maturity principle). For foreign currency products, please note that the daily exchange rates applied may constitute a key factor.
Swiss Withholding Tax	No Swiss withholding tax
Swiss turnover tax	Secondary market transactions are subject to the swiss turnover tax (TK22). If delivery of the underlying is stipulated, the swiss turnover tax may be imposed as well.
General Information	<p>Transactions and payments relating to this product may be subject to further (foreign) transaction taxes, duties and/or withholding taxes, in particular a withholding tax pursuant to the Section 871(m) of the US Internal Revenue Code. All payments from this product will occur with any applicable taxes and duties deducted.</p> <p>If delivery of the underlying is stipulated, foreign taxes and duties have to be assumed by the investors.</p> <p>The taxation mentioned is a non-binding and non-exhaustive summary of the applicable treatment of Swiss-domiciled private investors for tax purposes. The investor's specific circumstances, however, are not taken into account. We point out that Swiss and/or foreign tax law or the authoritative practice of Swiss and/or foreign tax authorities can change at any time or specify further tax or charge liabilities (possibly even with retrospective effect). Potential investors should have the tax effects of the purchase, holding, sale or repayment of this product examined by their own tax adviser - especially with respect to the effects of taxation under another jurisdiction.</p>

Prospects of Profit and Losses

Any possible gain results from the guaranteed fixed coupons. Nevertheless, there is an upper limit to the gain, as the maximum payment is the Nominal Value plus the coupons.

If the underlying closes at or above its Autocall-level on a monitoring date, the product is repaid early (detail see "Early Redemption").

These products have only conditional repayment at the Nominal Value defined by a Barrier: If the Underlying touches or breaches the Barrier during Barrier monitoring, the right of a guaranteed repayment at the Nominal Value ceases to apply immediately. Investors should be aware that this can happen during relevant Barrier Monitoring (period of time or point(s) of time). Accordingly, the risks are considerable; given upwardly limited chances of gains, they correspond largely to the risks of a direct investment in the Underlying. If the Strike Price is above 100%, the risk increases proportionally (in the ratio of Strike price to Spot Reference Price). The lower the closing price of the Underlying at maturity is, after falling below the Strike price, the greater the losses sustained. Apart from the coupon payments, in extreme cases, the maximum loss can lead to a loss of the capital invested.

Even if the performance of the Underlying is positive and the Barrier is not touched, the price of the product during the term can be considerably below the Issue Price. Potential investors should bear in mind that price changes to the Underlying, as well as other influencing factors, may have a negative effect on the value of structured products.

Assumptions and limitations in preparing the market scenarios

The following market scenarios should afford the investor a simplified way of making an assessment of the significant factors that influence the investment performance of the certificate. For a precise analysis of the profit and loss scenarios, reference must be made to the formulas and definitions set out in this termsheet, (e.g. for "reimbursement"), because these scenarios have been deliberately simplified in order to make them better understandable. With the exception of those certificates for which one of the following factors is defined as the underlying (e.g. a currency certificate or a certificate of interest), the impact of these risk factors will be excluded from the simplified presentation of the scenario

- Foreign currency risks
- Interest rate risks
- Volatility risks
- Issuer risk

- Reference bond (“default or redemption event”)
- Fees and costs both stemming from the certificate and for the acquisition and holding of the certificate

Market scenarios

Maximum gain:	Cap at coupon
Maximum loss:	100%
POSITIVE SCENARIO	
Indicative performance of the certificate:	0% to coupon
Necessary market performance of Underlying:	<ul style="list-style-type: none"> - If the Barrier is not reached, the performance corresponds to the Coupon - If the Barrier was reached, but the price loss in reference to the Strike Price of the relevant Underlying is smaller than the Coupon multiplied by the Strike Price in %, then the performance lies between 0% and the Coupon - Performance is limited to the Coupon (Cap)
BREAK EVEN	
Indicative performance of the certificate:	0%
Necessary market performance of Underlying:	<ul style="list-style-type: none"> - Barrier reached - Price loss in reference to the Strike Price of the relevant Underlying corresponds to the Coupon multiplied by the Strike Price in %
NEGATIVE SCENARIO	
Indicative performance of the certificate:	Loss of up to 100% possible
Necessary market performance of Underlying:	<ul style="list-style-type: none"> - Barrier reached - The price loss in reference to the Strike Price of the relevant Underlying is higher than the Coupon multiplied by the Strike Price in %

Significant Risks for Investors

Currency risks

If the underlying or underlyings is/are denominated in a currency other than the product's reference currency, investors should bear in mind that this may involve risks due to fluctuating exchange rates and that the risk of loss does not only depend on the performance of the underlying(s) but also on any unfavourable performance of the other currency or currencies. This does not apply for currency-hedged products (quanto structure).

Market risks

The general market performance of securities is dependent in particular on the development of the capital markets which, for their part, are influenced by the general global economic situation as well as by the economic and political framework conditions in the respective countries (so-called market risk). Changes to market prices such as interest rates, commodity prices or corresponding volatilities may have a negative effect on the valuation of the underlying(s) or the structured product. There is also the risk of market disruptions (such as trading or stock market interruptions or discontinuation of trading) or other unforeseeable occurrences concerning the respective underlyings and/or their stock exchanges or markets taking place during the term or upon maturity of the structured products. Such occurrences can have an effect on the time of redemption and/or on the value of the structured products.

In the event of trading restrictions, sanctions and similar occurrences, the issuer is entitled, for the purpose of calculating the value of the structured product, to include at its own discretion the underlying instruments at their most recently traded price, at a fair value to be established at its sole discretion or indeed as worthless, and/or additionally to suspend pricing in the structured product or liquidate the structured product prematurely.

Secondary market risks

Under normal market conditions, the issuer or the lead manager intend to post bid- and ask-prices on a regular basis. However, neither the issuer nor the lead manager is under any obligation with respect to investors to provide such bid- and ask-prices for specific order or securities volumes, and there is no guarantee of a specific liquidity or of a specific spread (i.e. the difference between bid- and ask-prices), for which reason investors cannot rely on being able to purchase or sell the structured products on a specific date or at a specific price.

Issuer risk

The value of structured products may depend not only on the performance of the underlying(s), but also on the creditworthiness of the Issuer and the Guarantor, which may change during the term of the structured product. The investor is exposed to the risk of default of the Issuer and the Guarantor. For further information on the rating of Bank Vontobel AG or Vontobel Holding AG, please see the Program.

Selling Restrictions

U.S.A., U.S. Persons, UK, DIFC/Dubai

European Economic Area (EEA): Investors should note the selling restrictions: since neither this termsheet nor the Issuance Program meets the requirements of the EU Prospectus Directive, the implementing regulations or the national transposing measures, this security may not be publicly offered for sale within the European Economic Area (EEA) until a corresponding prospectus has been drawn up and approved by the supervisory authority, unless: (a) this offer is aimed exclusively at qualified investors, (b) this offer is aimed at fewer than 150 investors in total in each state in the EEA, (c) the minimum investment amount per investor is EUR 100'000 or the securities have a minimum nominal value of EUR 100'000, or (d) the selling price of all the securities offered is less than EUR 100'000.

Further risk information and selling restrictions

Please also note the additional risk factors and selling restrictions set out in detail in the Issuance Program.

Legal Notices

Product documentation

Only the Termsheets published at www.derinet.com along with the associated notices and adjustments shall be legally valid.

The original version of the Termsheet is in German; foreign-language versions constitute non-binding translations. The Issuer and/or Bank Vontobel AG is entitled to correct spelling mistakes, calculation or other obvious errors in this Termsheet and to make editorial changes, as well as to amend or supplement contradictory or incomplete provisions, without the consent of the investors.

The "Termsheet (Final Terms)", which is usually issued on the date of the initial fixing, contains a summary of the most important final terms and information, and constitutes the "Final Terms" pursuant to art. 21 of the Additional Rules for the Listing of Derivates of SIX Swiss Exchange. Together with the current Issuance Program, registered with SIX Swiss Exchange (the „Issuance Program“), the Final Terms constitute the complete listing prospectus according to the Listing Rules. In the event of discrepancies between this Termsheet and the Issuance Program, the provisions of the Final Terms shall take precedence.

For structured products not listed on the SIX Swiss Exchange, the Termsheet (Final Terms) constitutes the definitive simplified prospectus pursuant to art. 5 of the Federal Act on Collective Investment Schemes (CISA). In addition, reference is also made (with the exception of the provisions authoritative for a listing) to the Issuance Program, in particular to the detailed information on risks contained therein, to the General Terms and Conditions and to the descriptions of the corresponding product types.

During the entire term of the Structured Product, all documents may be ordered free of charge from Bank Vontobel AG, Financial Products documentation, Bleicherweg 21, 8002 Zurich, Switzerland (telephone: +41 58 283 78 88) and may also be downloaded on the www.derinet.com website. Vontobel explicitly rejects any liability for publications on other Internet platforms.
