In Switzerland, these financial instruments are considered structured products. They are not collective investment schemes within the meaning of the Swiss Federal Act on Collective Investment Schemes (CISA), and are therefore not subject to the regulations of the CISA or the supervision of the Swiss Financial Market Supervisory Authority FINMA. The investors bear the Issuer’s and the Guarantor’s credit risk.

Product Description

These products are characterised upon issue by a discount on the Price of the Underlying, a Barrier as well as by a – albeit only conditional – redemption at the Nominal Value. The redemption at the end of the term is determined on the basis of the performance and the closing price of the Underlying: A redemption at the Nominal Value is guaranteed as long as the Underlying has not touched its Barrier during the relevant Barrier monitoring. If the Underlying has touched its Barrier but at Final Fixing is again higher than or equal to the Strike Price, the Nominal Value is repaid. Nevertheless, if the Underlying has touched its Barrier during Barrier Monitoring and at Final Fixing is lower than the Strike Price, the investor receives the delivery of the Underlying or a cash compensation, corresponding to the closing price of the Underlying (for details see “Redemption/Delivery”).

For example, ISS-oekom, one of the leading ESG research and rating agencies with an established rating methodology and high market recognition, awarded Vontobel the "Prime" status. The underlying of the product – Based on the ESG criteria, the underlying of the product has been rated as "sustainable" by the Vontobel ESG Competence Center in line with its best-in-class approach. Further information is published on the website www.derinet.com.

Tax treatment in Switzerland
Swiss Income Tax: Gains from this product are not subject to direct federal taxes.
Swiss turnover tax: No Swiss withholding tax.
General Information: Secondary market transactions are not subject to the Swiss turnover tax. If delivery of the underlying is stipulated, the swiss turnover tax may, however, be imposed. Transactions and payments relating to this product may be subject to further (foreign) transaction taxes, duties and/or withholding taxes, in particular a withholding tax pursuant to the Section 871(m) of the US Internal Revenue Code. All payments from this product will occur with any applicable taxes and duties deducted. If delivery of the underlying is stipulated, foreign taxes and duties have to be assumed by the investors. The taxation mentioned is a non-binding and non-exhaustive summary of the applicable treatment of Swiss-domiciled private investors for tax purposes. The investor's specific circumstances, however, are not taken into account. We point out that Swiss and/or foreign tax law or the authoritative practice of Swiss and/or foreign tax authorities can change at any time or specify further tax or charge liabilities (possibly even with retrospective effect). Potential investors should have the tax effects of the purchase, holding, sale or repayment of this product examined by their own tax adviser - especially with respect to the effects of taxation under another jurisdiction.

**Prospects of Profit and Losses**

Any possible gain results from the difference between the (lower) Issue price and the (higher) Nominal Value or repayment price. Nevertheless, there is an upper limit to the gain, as the maximum payment is the Nominal Value. These products have only conditional repayment at the Nominal Value defined by a Barrier: If the Underlying touches or breaches the Barrier during Barrier monitoring, the right of a guaranteed repayment at the Nominal Value ceases to apply immediately. Investors should be aware that this can happen during the relevant Barrier Monitoring (period of time or point(s) of time). Accordingly, the risks are considerable; given upwardly limited chances of gains, they correspond largely to the risks of a direct investment in the Underlying. The lower the closing price of the Underlying at maturity is, after falling below the Strike price, the greater the losses sustained. In extreme cases (with a closing price of the Underlying of zero), the maximum loss can lead to a loss of the capital invested. Even if the performance of the Underlying is positive and the Barrier is not touched, the price of the product during the term can be considerably below the Issue Price. Potential investors should bear in mind that price changes to the Underlying, as well as other influencing factors, may have a negative effect on the value of structured products.

**Assumptions and limitations in preparing the market scenarios**

The following market scenarios should afford the investor a simplified way of making an assessment of the significant factors that influence the investment performance of the certificate. For a precise analysis of the profit and loss scenarios, reference must be made to the formulas and definitions set out in this termsheet, (e.g. for "reimbursement"), because these scenarios have been deliberately simplified in order to make them better understandable. With the exception of those certificates for which one of the following factors is defined as the underlying (e.g. a currency certificate or a certificate of interest), the impact of these risk factors will be excluded from the simplified presentation of the scenario

- Foreign currency risks  
- Interest rate risks  
- Volatility risks  
- Issuer risk  
- Reference bond ("default or redemption event")  
- Fees and costs both stemming from the certificate and for the acquisition and holding of the certificate

**Market scenarios**

**POSITIVE SCENARIO**
Indicative performance of the certificate: 0% to Cap  
Necessary market performance of Underlying: - If the Barrier is not reached, the performance corresponds to the discount  
- If the Barrier was reached and the Strike price is reached or exceeded, the performance corresponds to the Cap

**BREAK EVEN**
Indicative performance of the certificate: 0%  
Necessary market performance of Underlying: - Barrier reached  
- Price loss of the relevant Underlying = discount

**NEGATIVE SCENARIO**
Indicative performance of the certificate: Loss of up to 100% possible  
Necessary market performance of Underlying: - Barrier reached  
- Closing price of Underlying is lower than the investment price, i.e. price loss of the relevant Underlying > discount

Maximum gain: Cap at Discount (= Strike price - Investment Price)  
Maximum loss: 100%
Significant Risks for Investors

Currency risks
If the Underlying or Underlyings is/are denominated in a currency other than the product's Reference Currency, investors should bear in mind that this may involve risks due to fluctuating exchange rates and that the risk of loss does not only depend on the performance of the Underlying(s) but also on any unfavourable performance of the other currency or currencies. This does not apply for currency-hedged products (quanto structure).

Market risks
The general market performance of securities is dependent in particular on the development of the capital markets which, for their part, are influenced by the general global economic situation as well as by the economic and political framework conditions in the respective countries (so-called market risk). Changes to market prices such as interest rates, commodity prices or corresponding volatilities may have a negative effect on the valuation of the Underlying(s) or the Structured Product.

Disruption risks
There is also the risk of market disruptions (such as trading or stock market interruptions or discontinuation of trading) or other unforeseeable occurrences concerning the respective Underlyings and/or their stock exchanges or markets taking place during the term or upon maturity of the Structured Products. Such occurrences can have an effect on the time of redemption and/or on the value of the Structured Products.

In the event of trading restrictions, sanctions and similar occurrences, the Issuer is entitled, for the purpose of calculating the value of the Structured Product, to include at its own discretion the Underlying instruments at their most recently traded price, at a fair value to be established at its sole discretion or indeed as worthless, and/or additionally to suspend pricing in the Structured Product or liquidate the Structured Product prematurely.

Secondary market risks
Under normal market conditions, the Issuer or the Lead Manager intend to post bid- and ask-prices on a regular basis. However, neither the Issuer nor the Lead Manager is under any obligation with respect to investors to provide such bid- and ask-prices for specific order or securities volumes, and there is no guarantee of a specific liquidity or of a specific spread (i.e. the difference between bid- and ask-prices), for which reason investors cannot rely on being able to purchase or sell the Structured Products on a specific date or at a specific price.

Issuer risk
The value of Structured Products may depend not only on the performance of the Underlying(s), but also on the creditworthiness of the Issuer and the Guarantor, which may change during the term of the Structured Product. The investor is exposed to the risk of default of the Issuer and the Guarantor.

For further information on the rating of Bank Vontobel AG or Vontobel Holding AG, please see the Issuance Program.

Risks associated with the Sustainability of the Product
A prospective investor should independently assess the information in relation to the sustainability of the Product and determine whether an investment in the product meets the investor's objectives and expectations or any investment guidelines applicable to the investor with respect to a sustainable investment. Vontobel Group (including the Issuer) makes no representation that the Product currently or in the future will meet the investor's objectives and expectations or any investment guidelines applicable to the investor with respect to a sustainable investment. In particular, the classification of a Product as "sustainable" may change during the life of the Product, for example when the Underlying of the Product no longer meets the sustainability requirements set. This is usually reviewed on a monthly basis. In case of a change, the classification of the Product on the website www.derinet.com will be updated.

Risks relating to potential conflicts of interest
There may be conflicts of interest at the Vontobel Group companies that could have a negative impact on the value of the Structured Products. For example, Vontobel Group companies may enter into or participate in trading and hedging transactions relating to the Underlying. They may also perform other functions relating to the Structured Products (e.g. as Calculation Agent, Index Sponsor and/or Market Maker) which enable them to determine the composition of the Underlying or calculate its value. Vontobel Group companies may also receive non-public information relating to the Underlying. It should also be noted that the payment of distribution fees and other commissions to financial intermediaries could result in conflicts of interest to the detriment of the investor, as this could create an incentive for the financial intermediary to distribute products with a higher commission preferentially to its clients. As market maker, Vontobel Group companies can determine the price of Structured Products themselves to a large extent and determine it on the basis of various factors and earnings considerations.

Please also note the further, detailed description of potential conflicts of interest and their impact on the value of the Structured Products as contained in the Issuance Program.

Selling Restrictions
U.S.A., U.S. Persons, UK, DIFC/Dubai
European Economic Area (EEA): Investors should note the selling restrictions: since neither this termsheet nor the Issuance Program meets the requirements of the EU Prospectus Directive, the implementing regulations or the national transposing measures, this security may not be publicly offered for sale within the European Economic Area (EEA) until a corresponding prospectus has been drawn up and approved by the supervisory authority, unless: (a) this offer is aimed exclusively at qualified investors, (b) this offer is aimed at fewer than 150 investors in total in each state in the EEA, (c) the minimum investment amount per investor is EUR 100'000 or the securities have a minimum nominal value of EUR 100'000, or (d) the selling price of all the securities offered is less than EUR 100'000.
